Information

Cuticle / Nail Fancy Scissors

All scissors are crafted from best quality stainless steel through hot drop forging method, which gives the instrument a sturdy formation and nice profile. The assembly consists of machine-made screw for smooth and frictionless operation. The surface finish gets the final out look after multiple grinding, polishing and cleaning processes.

Available in following finishes:

Mirror, Satin, Sand-blasted, Gold-plated completely or partially, Partially color coated

CUTICLE & NAIL SCISSORS

- All Scissors are also available in Straight, Curved blades.
- Satin, Mirror, Gold, Sand Finish, Color Coated.
- with Real, Imitation or Fix Screw.

Information

Cuticle / Nail Nippers

All nippers are completely hot drop forged from stainless steel in two categories;

1) Lap joint 2) Box joint

Each tool is machined and milled for perfection during assembly, which is then aligned to prevent slipping of the cutting tips.

The angle of sharpness is designed to make low force cutting functions.

Available in following finishes:

Mirror, Satin, Sand-blasted, Gold-plated completely or partially, Partially color coated.

CUTICLE NIPPERS, LAP JOINTS

Tip Sizes available

- 3mm

**Professional Barber Razor Edge Shears
Professional Barber Shears**

Barber Scissors

Hair Shapers & Razor Knives

Cutting Styles & Techniques

Cutting Position Depending On Handle Type

Point Cut, Blunt Cut, Slide Cut, Slice Cut

Chipping, Fan Cut

Thinning Styles & Techniques

Thinning, Tapering, Blending, Texturizing, Material

Japan Stainless Steel Aisi 1420b, Aisi 440a,

French Cobalt Steel

Shapping

Casting: Liquid Metal Is Poured Into A Mold.

If Properly Hardened, It Can Be Durable, But

Will Not Hold The Edge As Long As A Forged Shear

Drop Forging: A Weighted Mold Is Dropped With

Great Pressure On Ta A Hot Bar Of Steel.

The Alloy Is Pound Into A Desired Shaped Which

Makes The Metal More Dense. The Blade Holds

As Edge Longer And Is More Malleable.

Compression Forging: The Metal Is Crushes Into A

Desired Shape, Yielding A Highly Dense Metal.

Compression Forging Makes It Possible To Have A

Lighter Shear With Tremendous Strength.

Other

Titanium Coating, Super Mirror Finish, Triple

Annealed, Vacuum & Sub-zero Temering
